

Instructions for citing lab documents

PHYS 225 Guide

When you use information from lab documents, you need to cite them in your report. This includes using figures and equations you find for the lab.

Your reference should, at the very least, include:

- The title of the page
- The resource (PHYS 225 Lab Document)
- The author(s) if visible
- The last date the doc was updated if visible

There is no required reference style for the lab as long as relevant information is clear. If you are ever unsure, APA is a good default.

Example citations

In the report:

Current is the same through lightbulbs in series [1].

In the references section:

[1] Cothrel, Helen Mae, and Tackett, Ronald J. (2019) "Lightbulbs in Circuits", PHYS 225 Lab Document.

In the report:

Current is the same through lightbulbs in series (Cothrel & Tackett, 2019).

In the references section:

Cothrel, Helen Mae, and Tackett, Ronald J. (2019) "Lightbulbs in Circuits", PHYS 225 Lab Document.
